

A DATA API GUIDE

Buy vs Build

Do you struggle with the IT capabilities & budget to code, maintain and scale?

YES

NO

Buy an API solution

Get access to the latest in real-time financial data

Build the integration

Remember to budget for monitoring

Ask yourself these questions:

- Is the solution quick to adopt & easy to use?
- Can this solution provide integration from multiple data sources?
- Can the solution be seamlessly connected to your tech stack?

TIP

A good data integration solution is quick to set up & easy to use. It provides easy integration to multiple data sources - accounting, commerce, banking, payroll, tax & more, so you can scale & adapt the solution for future use cases.
